

## OVERVIEW

Each block contains the task of developing a same concept in pure Ruby, then in Postgres and RoR  
Understand utilization of Ruby and Postgres principles in RoR web apps.

Master thinking patterns that speed up development process.

Take advantage of one-to-one QA sessions with your teacher.

Work by yourself with the concise description of specific feature/functionality/concept, exercises and handy library of most relevant and up-to-date online resources.

Start solving tasks right away if you are already familiar with some Ruby and RoR code.

For a newbie - you can start your journey here with the basic knowledge and exercises with solutions

**BLOCK 1**

**single model**

**BLOCK 2**

**second model + has\_many belongs\_to relationships**

**BLOCK 3**

**many\_to\_many relationship**

**BLOCK 4**

**so on**
